SUMMARY

Frontend Developer specializing in React, Next.js, and TypeScript with 3+ years building production web applications. Built SISAPPRA information system for Satpol PP DKI Jakarta, developing complex modules including interactive organizational hierarchy charts, drag-and-drop Leaflet map interfaces, and mobile-responsive field officer UI. Strong in delivering pixel-perfect interfaces aligned with design specifications and managing complex nested data structures. Also experienced in mobile development, having solo-delivered 2 production Flutter apps (Turelth & JENOS) to Play Store in 3–4 months each. Comfortable owning the full development cycle, from requirement analysis and architecture design to deployment and maintenance.

EXPERIENCE

10/2023 - Present

Flutter Developer

PT Hydant Inovasi Semesta

- Solo-delivered 2 production Android apps from scratch to Play Store (JENOS in 3 months, Turelth in 4 months), owning the full development cycle from requirement gathering to deployment and maintenance.
- Architected parameter-driven configuration systems enabling backend-controlled behavior changes without redeployment.
- Built field monitoring app for PLN with multi-role forms, evidence workflows, and image optimization.
- Built workforce management system with ticketing, inventory tracking, and performance reporting for remote operations.

09/2022 - 05/2025

Frontend Developer

PT Tristar Surya Gemilang

- Built SISAPPRA information system for Satpol PP DKI Jakarta, handling complex modules from initial development to production.
- Developed interactive org charts and drag-and-drop Leaflet map interfaces with automatic geocoding, plus mobile-responsive field officer UI.
- Implemented complex nested data management and integrated dashboards with real-time visualization across multiple modules.
- Collaborate with the Back-End Developer Team to integrate APIs
- Coordinate with the UI/UX Analyst in finalized design concepts

EDUCATION

09/2024 - 2028

System Infomation

Universitas Terbuka

S1
